Career Objective

Dynamic front-end developer looking to bring his skills and passion for responsive website design, adaptation and maintenance to a communicative team setting, with the goal of delivering frictionless experiences across devices.

Technical Skills

- **Programming Languages:** HTML, CSS, PHP, JavaScript, Python
- **Tools & Frameworks:** jQuery, Wordpress, Affinity Designer, GitHub, Agile/Scrum

Education

Mentorship Program, Perpetual Education

July 2022 – Present

- Enrolled in an in-depth mentorship program that taught the process of software design and development
- Shaped professional skills while familiarizing with programming languages, application frameworks, and drawing tools

Computer Science Prep, Codesmith

September 2021 – January 2022

- Exposure to fundamental JavaScript concepts, foundations of programming languages, engineering best practices, and technical communication skills

Brookdale Community College, Lincroft, NJ

September 2018 – May 2021

- Non-Degree

Projects

Responsive Design Modules

- A series of responsively designed webpage layout modules; using media queries, grid layout, flexbox, dropdown functionality, light/dark themes, and SVGs

Layout Concept

- Iteratively designed using style tiles, mockups, and custom elements
- Tracking and organizing information from a large database
